Introduction
In this digital era, bridging the gap between text and visual content is becoming more intriguing. With Diffusers, you can harness the power of AI models and video generation techniques to convert text prompts into stunning videos. This repository provides a step-by-step guide and code to create your Text-to-Video converter.

Installation
Clone this repository:
git clone https://github.com/Vikramjeetsingh07/text-to-video-converter_with_diffusers.git

Usage

- Open text_to_video_with_diffusers.ipynb in your favorite Python environment.
- Modify the prompt variable to set your desired text prompt.
- Just hit run, you can see your results or search for the name of the output file in your directory.
